NEW WIND IN YOUR BAKERY!
RACK OVEN ROTO PASSAT - UNIQUE TECHNOLOGIE, UNIVERSALLY APPLICABLE.

Ranging from bread and bread rolls to yeast-raised pastries and pastry the Roto Passat by König ensures best, uniform baking quality for all your baked products and an optimal ratio between baking area and floor space at the same time. Smallest space requirements for approved technology. You are welcome to ask for our special folder:

König Maschinen Gesellschaft m.b.H., Stattegger Straße 80, 8045 Graz-Andritz, Austria

THE BAKER'S CROWN

Having Problems with Inconsistent Product?

*The Solution
is in the Details*

For some, sameness equals boring—but for bakers it's a thing of beauty. Being able to measure and control the many variables of the baking process – temperature, air velocity, heat flux and humidity, is the difference between inconsistent product and product that comes off the line the same – from line to line, from city to city, even from country to country. The SCORPION® Data Logging Measurement System from RTS, enables you to precisely measure and evaluate conditions throughout your baking process, allowing you to produce the same product on every line.

Visit us at **Interpack, Düsseldorf, Germany**
April 24-30, 2008, Hall #1 – Stand D17

Learn more about how The SCORPION® System can improve your production process. Ask about these new developments:

- **Hydrophobic Thermal Barriers** - a complete range of moisture resistant thermal barriers to meet process times from 3 minutes to 50 minutes.
- **Smart Charger / USB Interface** - a 1-hour fast charger with diagnostic display and USB interface to the **SCORPION®**.
- **Fast Response Temperature Sensor** - 30 times faster than previous designs providing excellent correlation between measured and process actual values.
